MERCED IRRIGATION DISTRICT

ATTACHMENT TO SUPPLEMENTAL STATEMENT OF WATER DIVERSION
AND USE

1997, 1998, 1999
STATEMENT NO. 4719

Amount of Use

- C. Water directly diverted and stored at Lake Yosemite is combined with water diverted from the Merced River and released from storage under MercedID's water right Licenses 2685, 6047, 11395 and its pre-1914 water right documented through Statement of Water Diversion and Use No. 4718. The specific quantity of water used under this claim is not available due to the physical features of Lake Yosemite and its incorporation into MercedID's delivery system. In most years, there is little to no flow in Fahrens Creek during July through September. Also, in most years, water stored under this claim is released in late summer and early fall from Lake Yosemite.

Purpose of Use

- D. As identified above, water under this claim is combined with other supplies available to MercedID for stock watering and to irrigate the following acres:

1997: 103,148
1998: 86,008
1999: 96,578

ATTACHMENT TO SUPPLEMENTAL STATEMENT OF WATER DIVERSION
AND USE
2000, 2001, 2002

STATEMENT NO. 4719

Amount of Use

- C. Water directly diverted and stored at Lake Yosemite is combined with water diverted from the Merced River and released from storage under MercedID's water right Licenses 2685, 6047, 11395 and its pre-1914 water right documented through Statement of Water Diversion and Use No. 4718. The specific quantity of water used under this claim is not available due to the physical features of Lake Yosemite and its incorporation into MercedID's delivery system. In most years, there is little to no flow in Fahrens Creek during July through September. Also, in most years, water stored under this claim is released in late summer and early fall from Lake Yosemite.

Purpose of Use

- D. As identified above, water under this claim is combined with other supplies available to MercedID for stock watering and to irrigate the following acres:

2000: 91,066
2001: 95,293
2002: 98,307

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO X
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)
I have data to support the above surface water use reductions due to wastewater reclamation YES _____ NO _____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO _____
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)
I have data to support the above surface water use reductions due to conjunctive use efforts. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

qday. waters 80 cows
Have not changed spring on amount of water used.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
